We want to tell you a story.
A true story of good lighting
and how to make it easy to plan,
achievable and affordable.

At the PROLED GROUP, we're all about good lighting. About high-grade products, and the wonders they can accomplish. About making lighting an exciting experience. In collaboration with our partners, we uncover the entire visible spectrum of functional and atmospheric lighting products, from cost-effective lighting essentials to design icons.

Always in the best light

mawa knows its way around museums, shops and libraries, sacred buildings and ancient monuments in Europe. Nowadays, many architects and planners benefit from the knowledge we have acquired in the planning of light, the development of luminaires and their installation.

mawa stands for attention to detail. We skilfully take up spatial, technical and factual requirements and adapt our products to them. Thanks to increasingly precise and flexible machines and robots, we can manufacture individual luminaires in quantities of 1 and upwards.

Special Mention

For over 10 years, our focus has been on LED developments in a variety of contexts: hospitality, villas, houses and apartments, boutiques, shops, and offices. We work in collaboration with LED manufacturers who have the necessary patents and licenses to respond to our customers' needs and the latest market trends. Every good lighting plan needs to meet the various requirements for its specific room and consider elements like visual comfort, energy efficiency, and personal preferences. Our technical team assists each client selecting lighting equipment and matching control systems.
